Overview of the EU funding related to healthy ageing

Below is a summary of EU funding sources which could be relevant to your work and your project on active and healthy ageing.

The EIP on AHA is not a new funding instrument. It aims to bring stakeholders together to exchange ideas, create and partner in projects which produce concrete deliverables.

The list of EU funding that may be accessed to fund EIP on AHA projects is not exhaustive, and there may be relevant and appropriate funding sources at national and regional level. If you would like to draw the Marketplace community's attention to a potentially relevant source of funding that is not listed, please contact us
